

Rubric for Assessment Meeting Report 2023

Enter M, A, or N

	Meets/Exceeds Standards	Approaches Standards	Needs Attention
Evidence Presentation	All evidence from the SAP has been collected and is provided in the report. The evidence is presented in a way that makes sense to an outside audience.	Most evidence from the SAP has been collected and appears to be included in the report. The evidence is presented in a way that leaves an outside audience with some remaining questions	Evidence either bears no relation to the SAP or is not included in the report.
Use of Evidence	There is an explicit, well-reasoned connection between the assessment results and the proposed changes. If no changes are proposed, the evidence provided backs up this decision.	There appears to be an adequate connection between the assessment results and the proposed changes, but it is not explicitly explained. If no changes are proposed, the evidence provided raises some questions about this decision.	The connection between the assessment results and proposed changes are indiscernible. If no changes are proposed, the evidence provided does not support this decision.
Evidence of Collaboration and Communication	There is explicit and documented evidence of departmental discussions and faculty collaboration on assessment, proposing any changes, and report preparation. If the department learning goal is assessed in an individual course, discussions take place at the program level.	Evidence exists of either departmental discussions or faculty collaboration on most assessment activities. If the department learning goal is assessed in a course, discussions are mostly at the course level but do include participation by the full department.	There is insufficient evidence of departmental discussions or faculty collaboration on assessment activities. If the department learning goal is assessed in a course, no participation of the wider department is evident.

Notes: The relationship between the assessment plan and the assessment activities is clear. All program faculty were actively involved with the discussion. There is some concern for the small sample size due to the decreasing number of majors, but they made use of longer-term data to yield a stronger conclusion than current-year data could provide. There was some insightful discussion of ways to improve, although its relationship to the assessment data was not altogether clear.
