* For digital televisions manufactured after 2007, no additional equipment is necessary to receive Conway Corporation's cable service. However, in order to receive the digital signal, once the analog signal has been shut off users will have to reprogram their pre-2007 televisions. For televisions that receive cable service through a digital, HD or DVR box, no action is needed. If you receive a cable signal to an analog TV, you will need to contact the Facilities Management office so that a digital adapter can be installed. If you have questions concerning this changeover, please contact the FM office at 450-1348. Basic cable is provided.
