- CHEM 120 General Chemistry II: Chemical Analysis and Reactivity

Students planning a career in physics or engineering should take all four of PHYS 320, 330, 370, and 380. PHYS 49X, MATH 270, and CSCI 150 are useful preparation for graduate study in physics or engineering.
All physics majors should do a research project while at Hendrix. Consult with any physics faculty member about research opportunities.

**Senior Capstone Experience**

The Senior Capstone Experience for the physics major consists of a comprehensive examination and an oral presentation of a research project or independent study. Students have two options for the examination. They may either take a national standardized examination (Advanced Physics Graduate Record Examination), or they may take a departmentally-designed examination, for which the student studies a set of questions for two hours, and then delivers a written response to a selection of questions. The grade for the Senior Capstone Experience is based on the examination.
