BIOCHEMISTRY/
MOLECULAR BIOLOGY

Professors Collins, Goodwin, Haggard, Kopper and M. Sutherland (chair)
Associate Professor Hales
Assistant Professors Duina and Murray

Biochemistry/Molecular Biology (BCMB) is an interdisciplinary major aiming at an in-depth understanding of living systems at the molecular level. Students in the BCMB major learn about cell structure, its characteristics from a biological and biochemical perspective, and its intricate and complex functions through which basic life processes are governed. To this end, the curricular structure for this major includes courses from various disciplines in the Natural Sciences, including Biology, Chemistry, Mathematics and Physics. In addition to the standard coursework, the BCMB curriculum emphasizes the importance of a research experience through which the students are exposed to the state-of-the-art techniques used by researchers in this field. The major also prepares undergraduate students interested in pursuing interdisciplinary graduate programs, such as genetic engineering, genomics, proteomics and bioinformatics. BCMB majors cannot minor in either chemistry or biology.

MAJOR

The BCMB major consists of these courses:

- MATH 140 Calculus II
- PHYS 210 General Physics I or PHYS 230 General Physics I (Calculus-based)
- CHEM 110 General Chemistry I: Chemical Structure and Properties
  and
  CHEM 120 General Chemistry II: Chemical Analysis and Reactivity
- CHEM 240 Organic Chemistry I and CHEM 250 Organic Chemistry II
- BIOL 150 Cell Biology
- BIOL 210 Botany or BIOL 220 General Zoology
- BIOL 250 Genetics
- CHEM 320 Physical Chemistry: Thermodynamics and Chemical Kinetics
- CHEM 330 Biochemistry
- BIOL 450 Advanced Cell Biology or BIOL 470 Advanced Genetics
- One upper level elective course from the following list
  BIOL 310 Developmental Biology
  BIOL 320 Animal Physiology
  BIOL 340 Microbiology
  BIOL 430 Immunology
  BIOL 450 Advanced Cell Biology
  BIOL 460 Evolution
  BIOL 470 Advanced Genetics
  BIOL 370 Plant Physiology
  CHEM 430 Integrated Biochemical Topics
- Research (BIOL 499, CHEM 450, or Independent Study)
  Subject to prior approval by the BMB core faculty.
  One semester course credit for work done either:
  a) during one summer (at least 8 weeks full-time work) at Hendrix or an off-campus summer research experience such as work under an REU program. All off-campus research projects must be pre-
approved by the Program Chair.
b) two semesters work at Hendrix.

**SENIOR CAPSTONE EXPERIENCE**
The Senior Capstone Experience will consist of a comprehensive examination (the Biochemistry, Cell and Molecular Biology Graduate Record Examination) and an oral presentation of the students research. The seminar will be assessed by members of the BCMB faculty.

**BIOCHEMISTRY/MOLECULAR BIOLOGY COURSES**

All the courses required for the Biochemistry/Molecular Biology major are described under the respective academic departments.
